LL periosteon, fr. Gk, neut. of periosteon around the bone, fr. peri-+ asteon bone — more at osseous] (1977): the membrane of connective tissue that closely invests all bones except at the articular surfaces

## PERIODIC TABLE

This is a common long form of the table. Roman numerals and letters heading the vertical columns indicate the groups. (There are differthis is a common long form of the table from numerous and letters heading the vertical colorina majeste the gloups (there are other ences of opinion regarding the letter designations, but those given here are probably the most generally used Also, international standards favor numbering the groups 1–18 from left to right using Arabic numerals, but the designations shown below remain quite common.) The horizontal rows represent the periods, with two series removed from the two very long periods and represented below the main table Atomic numbers are given above the symbols for the elements. Compare ELEMENT table
